Nuclear Medicine Communications **8**, 1092–1100 (1987)

INDEXES TO VOLUME 8

Subject index

The abbreviation (E) after a page number indicates an editorial article, (N) indicates a newsletter and (C) indicates a correspondence

Brain
Articles presented at the Silver Jubilee meeting of the institute of nuclear medicine, 512
Cerebral blood flow, 453 (E)
Comparison of $^{99}Tc^{m}$ complexes (NEP-DADT, ME-NEP-DADT and HMPAO) with ^{123}IAMP for brain SPECT imagings in dogs, 631
Pre-operative radionuclide localization of intracerebral lesions: a five-year experience, 407
Sequential computerized tomography and positron emission tomography studies in a patient with malignant glioma, 457

Cardiac
Automated processing of first-pass radionuclide angiocardiography by factor analysis of dynamic structures, 375
Evaluation of radiocardiographic methods for determination of cardiac output and right and left ventricular ejection fractions using a cardiac phantom, 815
Failure of normalized ventricular filling rates to predict true filling rates, 417
Improvement in indices of myocardial ischaemia in a case of hypertrophic obstructive cardiomyopathy treated with Verapamil, 177
Left and right ventricular function after streptokinase reperfusion: assessment by gated blood pool scans, 87
Measurement of right ventricular volumes from ECG-gated steady-state krypton-81m angiocardiography, 365
Nuclear cardiology results before and after percutaneous transluminal coronary angioplasty (PTCA): 1978–1986, 127
Phase mapping from left ventricular radionuclide ventriculograms interobserver reliability and accuracy of the programme, 805
Radionuclide cardiac monitoring system using dual cadmium telluride (CdTe) detectors: specification and some clinical applications, 431
The influence of glucose on the myocardial time-activity curve during 17-iodo-123 heptdecanoic acid scintigraphy, 207
Towards an ideal agent for cardiac imaging, 67 (E)

Endocrine
Breast milk – more data required, 125 (E)
Hot nodules and thyroid malignancy, 1090 (C)
In vivo kinetics of ^{123}I-labelled insulin: studies in normal subjects and patients with diabetes mellitus, 779

Nuclear Medicine Communications **8**, 1092–1100 (1987)

The influence of glucose on the myocardial time-activity curve during 17-iodo-123 heptdecanoic acid scintigraphy, 207
Towards an ideal agent for cardiac imaging, 67 (E)

Endocrine
Breast milk – more data required, 125 (E)
Hot nodules and thyroid malignancy, 1090 (C)
In vivo kinetics of ^{123}I-labelled insulin: studies in normal subjects and patients with diabetes mellitus, 779

Measurement of exchangeable sodium: ^{22}Na or ^{24}Na? 655
Non-linear correlation of basal serum TSH and TRH-stimulated TSH response: new aspects in pituitary-thyroid regulation, 1063
Optimizing selection of *in vitro* tests for diagnosing thyroid disorders, 759
Radiopharmacokinetics and radiation absorbed dose calculations from ^{131}I-*Meta*-Iodobenzylguanidine (^{131}I-MIBG), 643
Radiation absorbed doses from diagnostic thyroid procedures in Finland in 1985, 111
Use of the thyroid $^{99}Tc^{m}$ scintiscan with lead-shield on the hot nodule in the diagnosis of autonomous adenoma, 217

Gastrointestinal

Exercise and small intestinal transit, 105
Radiolabelled sucralfate: a review of clinical efficacy, 327
Radionuclide studies on gastric evacuatory function in health and in the duodenal ulcer disease. I. Types of solid meal distribution within the stomach and their relation to gastric emptying, 671
Radionuclide studies on gastric evacuatory function in health and in the duodenal ulcer disease. II. Regional distribution of emptying index (RDEI) patterns, 711
Reproducibility of oesophagal transit studies: several 'single swallows' must be performed, 317

Haematology and infection

Absolute quantification of pharmacokinetic distribution of RES colloids in individuals with normal liver function, 157
Phagocytosis and dynamic RES scintigraphy: an evaluation of commercial colloids in rats, 335
Radionuclide venography and uptake imaging using $^{99}Tc^{m}$-fibrinogen in the detection of venous thrombosis and its correlation with contrast venography, 921
Recent advances in cell labelling, 313 (E)
Scintigraphy of inflammation with nanometer-sized colloidal tracers, 895
Speed accumulation of ^{111}In-labelled granulocytes in focal non-osseous inflammatory processes, 623
$^{99}Tc^{m}$-MDP uptake by lymph nodes following tracer infiltration: clinical and laboratory evaluation, 357
Ultrastructure of human platelets following indium-111 labelling in plasma, 69

Kidney

Measurement of exchangeable sodium: ^{22}Na or ^{24}Na? 655
Measurement of glomerular filtration rate with a portable cadmium telluride detector, 751
Micturation detection switch, 723
Noninvasive measurements of blood flow and extraction fraction, 823
Renal fraction of cardiac output cleared of radioactive indicator in $^{99}Tc^{m}$-DTPA gamma camera renography, 489
Relative and absolute $^{99}Tc^{m}$-DMSA uptake measurements in normal and obstructed kidneys, 869
$^{99}Tc^{m}$-DMSA uptake in obstructed kidneys. How inaccurate are the 5 h measurements? 45
The determination of relative kidney function in obstructive uropathy with $^{99}Tc^{m}$-DMSA, 865
The implications of decreased performance of new generation gamma-cameras on the interpretation of ^{131}I-Hippuran renal images, 49

Liver and spleen

Absolute quantification of pharmacokinetic distribution of RES colloids in individuals with normal liver function, 157
A model of the hepatic perfusion index in the rat, 990
Antibody-guided irradiation of hepatic metastases using intrahepatically administered radiolabelled anti-CEA antibodies with simultaneous and reversible hepatic blood flow stasis using biodegradable starch microspheres, 1047
Arteriovenous shunting of microspheres in patients with colorectal liver metastases: errors in assessment due to free pertechnetate, and the effect of angiotensin II, 1033
CA-19-9 and CEA in the differential diagnosis of isolated liver metastases compared to clinical laboratory test, 787
Changes in the hepatic perfusion index during the growth and development of experimental hepatic micrometastases, 995
Hepatic perfusion index and the evolution of liver metastases, 968
Hepatic perfusion index in cirrhotic livers – investigation of imaging and analytical procedures, 1001
Induced hepatic arterial blockade by degradable starch microspheres in the rat, 1019
Initial clinical experience with degradable starch microspheres, 1011
Is SPECT of the spleen worthwhile in the evaluation of the liver disease severity? 33
Measurement of liver haemodynamics, 945 (E)
Noninvasive assessment of absolute values of hepatic haemodynamics using radiocolloid scintigraphy, 613
Proposal of segmental reading of radionuclide images of the liver, 11
Reliability of the hepatic perfusion index for the detection of liver metastases, 982
Single photon emission computed tomographic studies (SPECT) of hepatic arterial perfusion scintigraphy (HAPS) in patients with colorectal liver metastases: improved tumour targetting by microspheres with angiotensin II, 1025
The effect of methodology and tracer identity on a non-invasive index of liver blood flow, 973
The role of radionuclides in assessing hepatic haemodynamics and arterial therapy, 1059 (N)
The role of radionuclides in assessing hepatic haemodynamics and arterial therapy, Southampton General Hospital – 21–22 May, 1987, 949 (N)
Treatment of hepatocellular carcinoma (HCC) with radiolabelled Lipiodol: a preliminary report, 1075

Oncology

Antibody-guided irradiation of hepatic metastases using intrahepatically administered radiolabelled anti-CEA antibodies with simultaneous and reversible hepatic blood flow stasis using biodegradable starch microspheres, 1047
Arteriovenous shunting of microspheres in patients with colorectal liver metastases: errors in assessment due to free pertechnetate, and the effect of angtiotensin II, 1033
CA-19-9 and CEA in the differential diagnosis of isolated liver metastases compared to clinical laboratory test, 787
Changes in the hepatic perfusion index during the growth and development of experimental hepatic micrometastases, 995
'For' and 'against' bone scintigraphy of patients with breast cancer, 79
Hepatic perfusion index and the evolution of liver metastases, 970
Optimization and batch production of DTPA-labelled antibody kits for routine use in ^{111}In-immunoscintigraphy, 347

Single photon emission computed tomographic studies (SPECT) of hepatic arterial perfusion scintigraphy (HAPS) in patients with colorectal liver metastases: improved tumour targetting by microspheres with angiotensin II, 1025
Strontium kinetics in metastasized prostatic carcinoma: a comparison with the predictions of impulse response function analysis, 909
Thoracic imaging with technetium-99m-glucoheptonate in the diagnosis and assessment of patients with suspected broncial carcinoma, 149
Treatment of hepatocellular carcinoma (HCC) with radiolabelled Lipiodol: a preliminary report, 1075

Radiopharmacy

A computer controlled automated dispenser for the eluting, calibrating and dispensing of $^{99}Tc^{m}$-pertechnetate, 733
A new method for the $^{99}Tc^{m}$-labelling of proteins with an application to clot detection with an antifibrin monoclonal antibody, 771
Breast milk radioactivity following injection of $^{99}Tc^{m}$-pertechnetate and $^{99}Tc^{m}$-glucoheptonate, 839
Comparison of $^{99}Tc^{m}$ complexes (NEP-DADT, ME-NEP-DADT and HMPAO) with ^{123}IAMP for brain SPECT imaging in dogs, 631
Nuclear Medicine and Clinical Chemistry Departments, 767 (E)
Optimization and batch production of DTPA-labelled antibody kits for routine use in ^{111}In immunoscintigraphy, 347
Radioiodinated Rhodamine-123: a potential cationic hepatobiliary imaging agent, 99
Radiopharmaceuticals and the Medicines Act, 67
Recent advances in cell labelling, 313
Synthesis and biodistribution of labelled *p*-iodo phentermine (IP), *N,N,*-dimethyl-*p*-iodo phentermine (IDMP) and *N*-isopropyl-*p*-iodo phentermine (IIP) in rats, 441
$^{99}Tc^{m}$-hydroxyethyl starch: a potential radiopharmaceutical for lymphoscintigraphy, 395
The preparation of kits for labelling macromolecules of biological interest with technetium-99m, 199

Lung

A noninvasive assessment of pharmacological interaction of amines in the lung, 889
Interactions of phenylalkylamines with human lung membrane and microsome preparation, 115
In vivo tuberculoma creation and it's radioimmunoimaging, 139
Measurement of lung volume with $^{18}Kr^{m}$ in a dynamic scintigram, 479
The rapid reversibility of effects of changing lung volume on the clearance rate of inhaled $^{99}Tc^{m}$-DTPA in man, 881
Thoracic imaging with technetium-99m-glucoheptonate in the diagnosis and assessment of patients with suspected bronchial carcinoma, 149

Bone

'For' and 'against' bone scintigraphy of patients with breast cancer, 76
Strontium kinetics in metastasized prostatic carcinoma: a comparison with the predictions of impulse response function analysis, 909

Tomography instrumentation/computing
A computer controlled automated dispenser for the eluting, calibrating and dispensing of $^{99}Tc^{m}$-pertechnetate, 733
Automated processing of first-pass radionuclide angiocardiography by factor analysis of dynamic structures, 375
Detection of intercavitary masses on grated scans: a phantom study, 469
Evaluation of radiocardiographic methods for determination of cardiac output and right and left venticular ejection fractions using a cardiac phantom, 815
Improvement of the amplitude image through statistical filtering, 797
Influence of zoom factor on centre-of-rotation of the SPECT system on the resolution of tomographic images, 3
Is SPECT of the spleen worthwhile in the evaluation of the liver disease severity? 33
Measurement of glomerular filtration rate with a portable cadmium telluride detector, 751
Micturation detector switch, 723
Radionuclide cardiac monitoring system using dual cadmium telluride (CdTe) detectors: specification and some clinical applications, 431
Sequential computerized tomography and positron emission tomography studies in a patient with malignant glioma, 457
Single photon emission computed tomographic studies (SPECT) of hepatic arterial perfusion scintigraphy (HAPS) in patients with colorectal liver metastases: improved tumour targetting by microspheres with angiotensin II, 1025
Some call it laziness: I call it deep thought (with apologies to Garfield), 691
The random walk function in the analysis of time-activity curves from dynamic radionuclide studies, 189

Vascular
A new method for the $^{99}Tc^{m}$-labelling of proteins with an application to clot detection with an antifibrin monoclonal antibody, 771
Experimental popliteal vein thrombosis, 143
Measurement of liver haemodynamics, 945 (E)
Noninvasive measurements of blood flow and extraction fraction, 823
Radionuclide venography and uptake imaging using $^{99}Tc^{m}$-fibrinogen in the detection of venous thrombosis and its correlation with contrast venography, 921
Simplified assessment of arterial graft patency using indium-labelled-platelet scintigraphy, 727
$^{99}Tc^{m}$-hydroxyethyl starch: a potential radiopharmaceutical for lymphoscintigraphy, 395
$^{99}Tc^{m}$-MDP uptake by lymph nodes following tracer infiltration: clinical and laboratory evaluation, 357

Miscellaneous
Assessing the utility of imaging tests, 391 (E)
Breast milk – more data required, 125 (E)
Breast milk radioactivity following injection of $^{99}Tc^{m}$-pertechnetate and $^{99}Tc^{m}$-glucoheptonate, 839
British Nuclear Medicine Society 15th Annual Meeting, 187 (E)
Effective dose equivalent, 851 (E)
Estimation of close contact doses to young infants from surface dose rates on radioactive adults, 857

European Association of Nuclear Medicine – Further Progress, 611 (E)
Monitoring radiation dose to the hands in nuclear medicine: location of dosemeters, 499
Nuclear Medicine and Clinical Chemistry Departments, 767 (E)
Radiopharmacokinetics and radiation absorbed dose calculations from ^{131}I-*Meta*-Iodobenzyl-guanidine (^{131}I-MIBG), 643
Slides for the Highlights Lecture, 689 (E)
Some call it laziness: I call it deep thought (with apologies to Garfield), 691
The interpretation of diagnostic tests, 1 (E)
